

EAR CLASP HEADSET

Soohyun Ham

5 ABSTRACT OF THE DISCLOSURE

An ear clasp headset includes a speaker capsule for transmitting sound to a user's ear, wherein the speaker capsule is capable of contacting an inner recess of the user's ear, a headset body operably coupled to the speaker capsule, wherein
10 the headset body is capable of contacting an outer portion of the user's ear, and a headset tail operably coupled to the headset body, wherein the headset tail comprises a curved structure capable of flexing open and close for contacting a lower portion of the user's ear. Advantageously, the apparatus
15 and method of the present invention provide a headset with improved comfort, stability, and fit in the user's ear.
